Parallel Password Recovery (RAR module) v 2.0

RAR archiver uses very strong encryption, so the RAR passwords are very hard to break. Parallel Password Recovery for RAR is especially to gain maximal recovery rate **NEW** (Now with GPU acceleration on AMD GPUs!).

Features and benefits

✓ **Local and Distributed versions**

There are two key versions: local version which can be used by home user as well and distributed version for LAN and Internet. Advantage of home PCs up to 8 CPU processors/cores and GPUs. Distributed version is more professional one with possibilities.

✓ **Password Definition Language**

It is the most important innovative feature of Parallel Password Recovery suite. It supports all well-known standard attack types (brute force, wordlist, etc) and also allows users to make their own attack types. PDL language is extremely efficient. It allows to define any type of password information about a forgotten password (for example, the password consists of two words separated by a special sign or character).

✓ **Parallel computing**

Any of versions efficiently vectorize a password recovery process as on physical processors/cores and GPUs so on distributed versions are easily vectorized.
